The WF7515MZTL is part of the Long Working Distance (LWD) range and with its Long Working Distance and magnification range from 10 – 140x, it is suitable for a wide range of applications where extra distance to the object or a larger field of view is required.

The extra working distance and larger field of view make this model an ideal solution for tasks such as repair, rework or assembly or for working with bulky or fragile objects that cannot be touched. Because of the built-in polarization filter this model is ideal when working with shiny or reflective objects such as metal, plastic, glass, jewelry, electronics, etc. The AMR function is of particular importance when the measurement functions are frequently used.

The main features of the WF7515MZTL are:

• 5 Megapixel Edge sensor
• Long Working Distance (LWD)
• 10-140x magnification
• Integrated polarizer
• Aluminum housing
• Automatic Magnification Reading (AMR)
• Flexible LED Control (FLC)
• Extensive measurement functions
• Calibration
• Exchangeable front caps
• Wireless
• And more...
